Requirements

Minimum requirements for running Idera SQL Comparison Toolset are:

- .NET Framework 4.6 or higher, available from the Microsoft Developer Tools Download Center
- at least 50MB of free space on the hard drive where the application will be installed (depends on the size of the databases you want to compare and synchronize)
- Windows XP SP3 or later / higher versions of Windows operating systems
- minimum of 512MB of memory; 1GB or higher recommended
- minimum resolution of 1024x768 suggested for the GUI
