

Customizing Tables

The Table Settings step allows you to customize various table settings. You can change all or some of the following settings:

- The key that should be used to compare the data between tables. This is useful when a table has no primary key or other unique indexes in SQL Server.
- A where clause that should be used to filter the table data.
- Columns that should be excluded from the comparison.

Optional) Specify table settings, such as the custom data key, excluded columns and where clauses.

Source Table
 Schema: HumanResources
 Name: Employee

Target Table
 Schema: HumanResources
 Name: Employee

[Update](#) [New Entry](#)

Source Custom Key
 Key columns separated by comma: column1.column2...
 EmployeeID

Target Custom Key
 Key columns separated by comma: column1.column2...
 EmployeeID

Source Where Clause (without the "where" keyword)

Target Where Clause (without the "where" keyword)

Excluded Columns
 Excluded columns as source.target separated by commas: x-column1.y-column1.x-column2.y-column2...
 rowguid.rowguid.ModifiedDate.ModifiedDate

To modify an item, click on it. To delete an item, select it and press the Delete key [Delete All](#)

	Source table	Target table
✖	HumanResources.Employee	HumanResources.Employee

[Previous](#) [Next](#) [Exit](#)

The following fragment is the xml generated when some tables settings are changed:

```

<TablePairs>
  <!-- ***** ***** -->
  <!-- ***** custom tables ***** -->
  <!-- ***** HumanResources.Employee ***** -->
  <Pair Action="Include">
    <LeftObject Schema="HumanResources" Name="Employee">
      <Key Name="410c760f-c11a-47b6-a400-924eb70f7f2a">
        <Column>EmployeeID</Column>
      </Key>
    </LeftObject>
    <RightObject Schema="HumanResources" Name="Employee">
      <Key Name="605242e3-ccfa-449e-ad12-5b9c59df0780">
        <Column>EmployeeID</Column>
      </Key>
    </RightObject>
    <Columns Action="Exclude">
      <ColumnPair>
        <LeftColumn>rowguid</LeftColumn>
        <RightColumn>rowguid</RightColumn>
      </ColumnPair>
      <ColumnPair>
        <LeftColumn>ModifiedDate</LeftColumn>
        <RightColumn>ModifiedDate</RightColumn>
      </ColumnPair>
    </Columns>
  </Pair>
  <!-- ***** ***** -->
</TablePairs>

```
