

Use the Console to groom events

When you groom events using the Management Console, IDERA SQL Compliance Manager also performs the following actions:

- Checks the integrity of the collected events to ensure you are grooming uncompromised data. ***If the audit data for the selected SQL Server instance fails this integrity check***, SQL Compliance Manager does not groom the data.
- Logs the event in the Change Log.

To groom archived events:

1. Click **Auditing** on the menu bar, and then select **Archive and Retention > Groom Audit Data Now**.
2. Specify the appropriate settings, and then click **OK**.
