

Deploy Reports wizard - SQL Compliance Manager Repository tab

The SQL Compliance Manager Repository tab of the Deploy Reports wizard allows you to specify which Windows user account IDERA SQL Compliance Manager should use to connect to the Repository. You can use the same account that the Collection Service runs under, or you can specify a different account.

Specify the name of the SQL Server instance that hosts the Repository, enter the appropriate account credentials, and then click **Next**.

The screenshot shows the 'Deploy Reports' wizard window with the 'SQL Compliance Manager Repository' tab selected. The window title is 'Deploy Reports'. The tab title is 'SQL Compliance Manager Repository'. Below the title is the instruction: 'Specify the location and credentials for the SQL Compliance Manager Repository.' The form is divided into two sections: 'Repository Server' and 'Repository Credentials'. The 'Repository Server' section has the instruction 'Specify which SQL Server instance hosts the SQL Compliance Manager Repository:' and a text box labeled 'SQL Server:' containing 'WIN-'. The 'Repository Credentials' section has the instruction 'Specify the credentials the Report Server will use to connect to the Repository. The specified account should have permission to execute stored procedures on the Repository database.' and three text boxes: 'Login ID (domain\user):' containing 'IDERAINFODEV\', 'Password:', and 'Confirm Password:'. At the bottom of the window are four buttons: '< Back', 'Next >', 'Finish', and 'Cancel'. The 'Next >' button is highlighted with a blue border.

Deploy Reports

SQL Compliance Manager Repository
Specify the location and credentials for the SQL Compliance Manager Repository.
