Edit rule details (click on an underlined value)

Generate a Medium alert
for **Login Activity** events
on SQL Server WIN-N23BE3A8DSG
where Login Name like 'nrios'
Send an alert message to
Windows Event Log entry of type Information
and specified network management console

< Back **Next >** Finish Cancel

Available actions

Select when this alert should be triggered

Allows you to select the condition under which the alert should trigger. For example, you can specify that the alert rule look for security changes performed by privileged users or only alert on events that are successful.

Edit rule details

Allows you to specify a value for the selected condition, such as true or false.

The rule details pane also allows you to change your specified alert rule criteria at any time as you edit your alert rule. As you specify criteria using the Edit Alert Rule wizard, the rule details grows to include these additional settings. To edit previously set criteria, click the corresponding setting.
