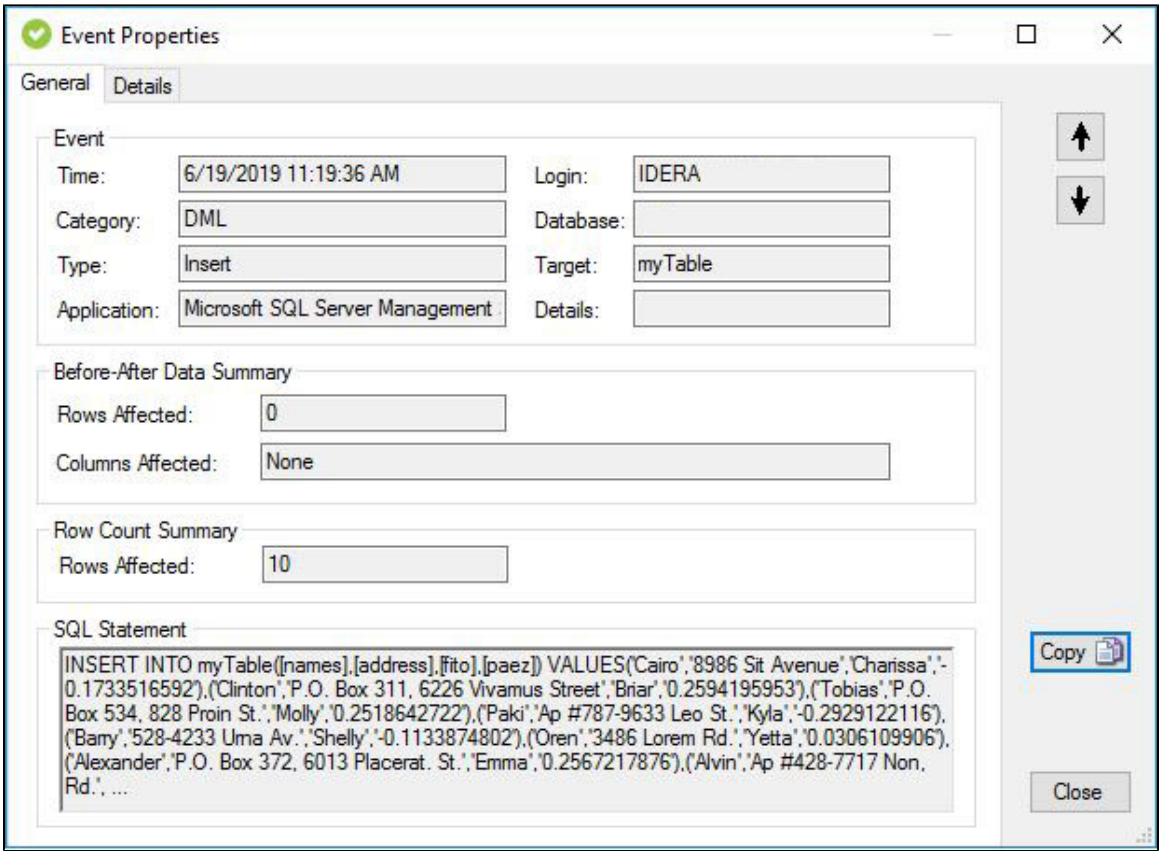
Event Properties window - General tab

The General tab of the Event Properties window allows you to view high-level information about an individual event.

You can view the following information:

- Date and time the event occurred
- Type and category of event
- Application where the event occurred
- Database and target object on which the event occurred
- User who executed the event
- Summary of rows and columns changed by this event (if collected)
- Row count information (if available)
- Corresponding SQL statement (if audited)

To scroll from one event to the next, use the up and down arrows.


To copy the event details to another application, click **Copy**. This action copies the event details to your clipboard, allowing you to paste the contents into another application such as Microsoft Word.
