

New SQL Server Login wizard - SQL Server Windows Authentication tab

The SQL Server Windows Authentication tab of the New SQL Server Login wizard allows you to specify which Windows user account should be used when creating the SQL Server login to access IDERA SQL Compliance Manager. You can also grant or deny security access to the SQL Server instance that hosts the Repository databases.

Type the log name of the Windows user account (DomainName\UserName), select the appropriate security access, and then click **Next**.

The screenshot shows the 'New SQL Server Login' wizard window. The title bar reads 'New SQL Server Login'. The main heading is 'SQL Server Windows Authentication' with the subtitle 'Specify properties for the new SQL Server login'. Below this, it says 'Specify a Windows user account to be used to access SQL Compliance Manager:'. There is a text box labeled 'Name:' containing the text 'IDERA'. Below the text box is a section titled 'Security Access' containing two radio buttons: 'Grant access' (which is selected) and 'Deny access'. Below this section is a checkbox labeled 'Web Application Access' which is currently unchecked. At the bottom of the window are four buttons: '< Back', 'Next >' (which is highlighted with a blue border), 'Finish', and 'Cancel'. On the left side of the window, there is a blue vertical bar with a graphic of a server rack and a person's head.
