

New SQL Server Login wizard - Summary tab

The Summary tab of the New SQL Server Login wizard allows you to review the provided summary, and then click **Finish**. When you finish this wizard, IDERA SQL Compliance Manager creates a SQL Server login with the specified permissions on the SQL Server instance that hosts the Repository databases.

If you want to change a setting now, click **Back** to return to the appropriate window. You can also change login settings later using the Login Properties window.

The screenshot shows the 'New SQL Server Login' wizard window. The title bar reads 'New SQL Server Login' with a green checkmark icon on the left and help (?) and close (X) buttons on the right. The main content area is titled 'Summary' and says 'Ready to create the SQL Server Login'. Below this, it states 'You are ready to create the new SQL Server Login using the following options:'. There are two configuration options: 'Login Name:' with a text box containing 'IDERA', and 'Grant login permission to administer SQL Compliance Manager:' with a 'Yes' button. A message at the bottom says 'Click Finish to create the new login.' The bottom of the window has four buttons: '< Back', 'Next >', 'Finish' (which is highlighted with a blue border), and 'Cancel'. On the left side of the wizard, there is a blue vertical bar with a graphic of a server rack and a person's head with a gear inside.
