

# Software requirements

The following sections provide the software requirements for each IDERA SQL Compliance Manager component. For more information, see [Product components and architecture](#).

Support for MS SQL Server software includes case-sensitive servers and databases. Support for Windows operating systems includes English and international versions. **If an operating system service pack is not mentioned**, a service pack is not required for that version of the operating system.

All SQL Compliance Manager 5.0 and later versions require .NET 4.0 components. Previous versions of SQL Compliance Manager require at least .NET 3.5.

IDERA SQL Compliance Manager 5.5.x depends on certain Microsoft components that did not ship with SQL Server versions prior to SQL Server 2012 SP1. Before starting the installation process, please review some [important installation steps](#).

Sensitive Column auditing is supported by SQL Compliance Manager Agent 3.5 or later. To use this feature, please ensure you upgrade your agent to at least version 3.5.

## SQL Compliance Manager Windows cluster support

You can install SQL Compliance Manager on a Windows cluster 2008, 2012 and later. For more information, review the [supported installation scenarios](#) and [Audit a virtual SQL Server instance](#).

## Audited SQL Server

The audited SQL Server computer should meet or exceed the software requirements recommended by Microsoft to run and manage SQL Server databases. Note that .NET 4.0 or later must be installed on the audited server.

In a clustered environment with virtual SQL Servers, the audited SQL Server is the virtual SQL Server. However, each node (physical computer) in the cluster that hosts the virtual SQL Server must meet or exceed these requirements.

SQL Compliance Manager supports auditing the following Microsoft SQL Server versions.

SQL Server Version	Operating System
SQL Server 2022	Windows Server 2012, Windows Server 2012 R2, Windows Server 2016, Windows Server 2019, Windows Server 2022
SQL Server 2019	Windows Server 2012, Windows Server 2012 R2, Windows Server 2016, Windows Server 2019
SQL Server 2017	Windows Server 2012, Windows Server 2012 R2, Windows Server 2016
SQL Server 2016	Windows Server 2012, Windows Server 2012 R2, Windows Server 2016
SQL Server 2014	Windows Server 2012
SQL Server 2012 SP1	Windows Server 2012

## Collection Server

The Collection Server stores SQL Compliance Manager configurations and audit data. Ensure your Collection Server resides on a version of SQL Server that is greater than or equal to the highest audited SQL Server version. For example, if the most current version of SQL Server that you are auditing is on SQL Server 2016 then your Collection Server instance could be SQL Server 2016 or 2017 but not 2012.

The Repository must reside on a version of SQL Server that is greater than or equal to the highest audited SQL Server version.

Software Type	Requirement
---------------	-------------

Operating System	<p>The Collection Server requires one of the following operating systems:</p> <ul style="list-style-type: none"> <li>• Windows Server 2022</li> <li>• Windows Server 2019</li> <li>• Windows Server 2016</li> <li>• Windows Server 2012</li> <li>• Windows 11</li> <li>• Windows 10</li> <li>• Windows 8.1</li> <li>• Windows 8</li> <li>• Windows 7 SP1+</li> </ul>
Microsoft SQL Server	<p>The Collection Server requires one of the following versions of Microsoft SQL Server:</p> <ul style="list-style-type: none"> <li>• SQL Server 2022</li> <li>• SQL Server 2019</li> <li>• SQL Server 2017</li> <li>• SQL Server 2016</li> <li>• SQL Server 2014</li> <li>• SQL Server 2012 SP1</li> </ul>

## Management Console

Ensure each console computer meets or exceeds the following software requirements. You can install the console on the Collection Server computer, or any client computer for remote access to your audit data.

Software Type	Requirement
Operating System	<p>The Collection Server requires one of the following operating systems:</p> <ul style="list-style-type: none"> <li>• Windows Server 2022</li> <li>• Windows Server 2019</li> <li>• Windows Server 2016</li> <li>• Windows Server 2012</li> <li>• Windows 11</li> <li>• Windows 10</li> <li>• Windows 8.1</li> <li>• Windows 8</li> <li>• Windows 7 SP1+</li> </ul> <p>The Management Console computer also requires Microsoft Data Access Components (MDAC) 2.6 or later. If you plan to audit SQL Server 2005 instances, upgrade to MDAC 2.8 or later. SQL Server 2005 requires MDAC 2.8 to communicate with other applications.</p>
Documentation	Internet Explorer 7.0 or later

## Agent

SQL Compliance Manager 5.6 requires you to upgrade the SQL Compliance Manager agents to the same version.

Ensure the computer where the agent resides meets or exceeds the following software requirements.

Software Type	Requirement
---------------	-------------

Operating System	<p>The agent requires one of the following operating systems:</p> <ul style="list-style-type: none"> <li>• Windows Server 2022</li> <li>• Windows Server 2019</li> <li>• Windows Server 2016</li> <li>• Windows Server 2012</li> <li>• Windows 11</li> <li>• Windows 10</li> <li>• Windows 8.1</li> <li>• Windows 8</li> <li>• Windows 7 SP1+</li> </ul>
------------------	--

## Cloud

SQL Compliance Manager runs on various Cloud Virtual Machines running Microsoft Windows Server and Microsoft SQL Server.

Cloud Service Delivery Model	IaaS	PaaS (DBaaS)
Amazon EC2	Windows Server SQL Server	-
Microsoft Azure VM	Windows Server SQL Server	-
Google Cloud Platform	Windows Server SQL Server	-
Amazon RDS	-	SQL Server
Amazon EC2 SQL Server	-	SQL Server

Amazon RDS support is limited to use it as an audited instance.

## Web Console

Supported web browsers for the IDERA SQL Compliance Manager Web console include:

- Internet Explorer 10.x+
- Microsoft Edge
- Google Chrome
- Mozilla Firefox

It is important for you to review the [IDERA Dashboard requirements](#) before installing SQL Compliance Manager.

SQL Compliance Manager is ONLY compatible with IDERA Dashboard version 4.6 and with limited support.
