

Managing licenses in the IDERA Dashboard

 SQL Compliance Manager is ONLY compatible with IDERA Dashboard version 4.6 and with limited support.

The IDERA Dashboard allows you to manage licenses for the different IDERA SQL products.

To view and manage licenses, click **Manage Licenses** in the **Administration** tab.

In the **Manage Licenses** view, you can see the following information:

- Product
- License key
- No. Of Instances

To **Add**, **Edit**, and/or **Delete** a license, click on a license from the list and fill the required information or make the necessary changes.
