

# Activity Log tab

The Activity Log tab lists events and alerts initiated by the IDERA SQL Compliance Manager components, allowing you to monitor SQL Compliance Manager operations and diagnose issues.

## Available actions

### View activity details

To view detailed information about a particular event, double-click the event entry in the Activity Log. For more information, see [Activity Log Properties window](#).

### View system alerts

To view detailed information about a system alert, double-click the event entry in the Activity Log. SQL Compliance Manager generates the following types of system alerts.

| System Alert                        | Caused by ...  | Resolves when ...   |
|-------------------------------------|--|---|
| Agent Configuration Error           | Error saving the SQL Compliance Manager Agent configuration file (.bin)<br>Error loading the new configuration | File is successfully saved<br>SQL Compliance Manager Agent configuration is successfully updated      |
| Collection Service Connection Error | Collection Server is offline or the SQL Server instance hosting the Repository is offline                      | Connection to the collection service is established   |
| CLR Error                           | Error when enabling CLR, creating or modifying the before-after data trigger, or performing a health check     | SQL Compliance Manager Agent configuration update or health check is successful                       |
| Server Connection Error             | Error when connecting to the audited instances, due to invalid permissions or the offline SQL Server instance  | Connection is established   |
| SQL Trace Error                     | Error when starting or stopping the audit traces   | Audit traces are started or stopped   |
| Trace Directory Error               | Error when creating trace directory or when reaching the maximum size allocated for the trace directory        | Trace directory is created or the trace files are transferred to the Collection Server for processing |

### Page through activities

Allows you to page through the list of activities. Use the previous and next arrows to navigate from page to page, up and down the list.

**Filters**

Allows you to filter the listed activities by time span (for example, last seven days).

**Enable Groups**

Allows you to group activities by a specific property, such as the computers on which the activities occurred or the times the activities occurred. Enable groups when you want to sort the activities or focus on a particular activity attribute.

**Refresh**

Allows you to update the activity list with current data.

## Available columns

**Date**

Provides the date that the event occurred.

**Time**

Provides the time that the event occurred.

**SQL Server**

Provides the name of the SQL Server instance, using the format SQLServerName\InstanceName.

**Event**

Provides the type of event that occurred.

**Details**

Displays the first line of the event details.
