

New Data Alert Rule wizard - Additional Event Filters tab

This tab allows you to define when the selected event should trigger this alert rule. You can specify more than one condition.

New Data Alert Rule

Data Alert Type
Specify when the selected event should trigger this alert.

Additional Event Filter

☐ Application Name

☒ Login Name

☐ Row Count (with Time Interval)

Edit rule details (click on an underlined value to edit)

Generate a Medium alert
when a **Sensitive Column is accessed**
in any database in instance WIN-N23BE3A8DSG
where Login Name like 'sa'

[Previous](#) [Next](#) [Cancel](#)

Available actions

Select when this alert should be triggered

Allows you to select the condition under which the alert should trigger. For example, you can specify that the alert rule look for an Application Name, Login Name or by Row Count.

Edit rule details

Allows you to specify a value for the selected condition, such as true or false.

The rule details pane also allows you to change your specified alert rule criteria at any time as you create your new alert rule. As you specify criteria using the New Data Alert Rule wizard, the rule details grows to include these additional settings. To edit previously set criteria, click the corresponding setting.
