

Server Login Activity Summary Report

The Server Login Activity Summary Report lists user activities performed on a specific SQL Server instance with details per login. Use this report to audit user behavior and login management.

The screenshot displays the IDERA SQL Compliance Manager interface. On the left, the 'Audit Reports' sidebar lists various reports, with 'Server Login Activity Summary' highlighted. The main panel, titled 'Alerts / History', shows a grid of report thumbnails. The 'Server Login Activity Summary' report is highlighted with a green border. Below the main panel, there are sections for 'Reporting Services' and 'Administration'.

A filter can include a list of wildcards, separated by commas, where a wildcard is a string, which may contain asterisks. The following parameters are specific to the selected report and enable you to filter the data to include in the report.

Available actions

Server Instance

Allows you to select a registered instance on which you want to report. Select **ALL** to report on all instances.

Login

Allows you to select the login from the drop down list of available logins. Select **ALL** to report on all logins.

Start Date

Allows you to select the start date for the range from which you want to report.

End Date

Allows you to select the end date for the range from which you want to report.

Start Time - Hour

Allows you to select the exact starting hour of the day for the range from which you want to report.

Start Time - Min

Allows you to select the exact starting minute of the day for the range from which you want to report.

Start Time - AM/PM

Select between AM or PM from the drop down list to configure the Start Time for Each Day range from which you want to report.

End Time - Hour

Allows you to select the exact ending hour of the day for the range from which you want to report.

End Time - Min

Allows you to select the exact ending minute of the day for the range from which you want to report.

End Time - AM/PM

Select between AM or PM from the drop down list to configure the End Time for Each Day range from which you want to report.

Application

Allows you to type the name of one or more applications on which you want to report.

Login Status

Allows you to define the login status you want this report to filter on. Select between the following options; Both, Login or Login Failed.

Run Report

Click this button to Run the report.

Default columns

Login

The Login column displays the login name of the user who performed the event.

Application

The Application column displays the name of the application used to capture the event.

Count

The Count column displays count value.
