Get started

Use the following checklist to guide you through the process of getting started with IDERA SQL Secure.

✅	**Follow these steps ...**
✅	Register the SQL Server instances whose security models you want to assess and audit.
✅	Configure snapshots to collect audit data from the registered instances.
✅	Find security issues using the default All Servers policy.
✅	Create custom policies to assess compliance to specific security regulations.
✅	Save assessments for policies you want to use in your audit process.
✅	Compare assessments to identify changes over time.
✅	Perform forensic analysis of your security model using the Permissions Explorer.
✅	Discover vulnerabilities using the built-in reports.

IDERA SQL Secure tells you who has access to what on your SQL Server databases. Learn more > >
