## Choose to take snapshot now

The **Take Snapshot** section gives you the option to collect audit data at the end of the registration process. Choose this option when you want to immediately perform a security assessment on the newly registered instance. Note that you can also manually take a snapshot later by selecting **Take Snapshot** on the **Explore Permissions** view (Click here for more information about Snapshots). IDERA SQL Secure must collect data from the Registered Server to assess and audit security risks and access rights.

If you want to take a snapshot as soon as finish registering your SQL Server instance, make sure to check the option Yes, collect data upon completion of the registration process.

Click Next to go Registration Summary section.

SQL Secure tells you who has access to what on your SQL Server databases. Learn more > >
