

Define folders for file system permissions checks

In the **Specify Audit Folders** section you can specify which folders will be audited for collecting file system permission information.

Click **Add** and type a mapped drive folder or a folder in UNC format. You can add as many folders as you require.

If you want to change or delete any of the previously added folders, click **Edit** or **Remove** respectively.

Click **Next** to go to [adding Server Group Tags](#).

SQL Secure tells you who has access to what on your SQL Server databases. [Learn more](#) > >
