

Assigned role permissions

The IDERA SQL Secure **Assigned Permissions** tab lists all the explicitly defined and inherited permissions that apply to calculating the role members' effective permissions. You can view permissions information for the selected role and any parent role to which it belongs.

Usually this information is grouped by type of object. You can expand any type of object and see the properties of the objects that correspond to that type.

SQL Secure tells you who has access to what on your SQL Server databases. [Learn more](#) > >
