

# Analyze enterprise security

The IDERA SQL Secure Enterprise **Security Summary** displays the status of your security policies at the enterprise level. By default, SQL Secure displays the **All Servers** policy assessment.

 By default, the **All Servers** policy enforces the IDERA Level 2 - Balanced template. For more information, see how [policy templates](#) can help you achieve your SQL Server security goals.

To see the Enterprise **Security Summary** for a specific policy, select the policy from the Policies tree on the Security Summary view. The following information is available from the Enterprise Security Summary:

- [Enterprise Security Report Card](#)
- [Enterprise Security Settings](#)
- [Enterprise Security Users](#)

SQL Secure tells you who has access to what on your SQL Server databases. [Learn more](#) > >
