

Analyze server security

The IDERA SQL Secure **Security Summary** view displays the status of your security policies at the instance level. To see the Server Security Summary for a policy, expand the corresponding policy node in **Servers in Policy** tree, and then select the target SQL Server instance.

The following tabs are available from the Server Security Summary:

- [Server Security Report Card](#)
- [Server Security Settings](#)
- [Server Security Users](#)

SQL Secure tells you who has access to what on your SQL Server databases. [Learn more >>](#)
