

Report on SQL Server Security

The **Reports** component of IDERA SQL Secure allows you to generate reports on SQL Server permissions. Use reports to confirm regulatory compliance and enforce security policies.

SQL Secure contains two different ways to access reports. Quick Reports are reports that have been built into SQL Secure to allow you to quickly generate reports that answer the most common SQL Server security questions. You can also generate reports using Microsoft Reporting Services. Microsoft Reporting Services allows you to build powerful, custom reports for a comprehensive auditing solution.

SQL Secure allows you to:

- [Generate reports within the SQL Secure interface](#)
- [Generate reports using Microsoft Reporting Services](#)

SQL Secure tells you who has access to what on your SQL Server databases. [Learn more > >](#)
