Specify the reports virtual directory

This **Report Deployment Location** section allows you to specify the name of the folder where the reports should be stored. This folder belongs to the Virtual Directory specified in the Reporting Services connection settings, and is displayed when you access the reports using the Report Manager interface.

You can also specify whether you want to overwrite existing reports. Click **Overwrite existing reports** to enable this option. By overwriting existing reports, you ensure all deployed reports are current. *If you decide not to overwrite existing reports*, the Deploy Reports wizard installs only the reports that are new or updated in this version of IDERA SQL Secure.

Click **Next** to continue to the Summary section before finishing the wizard.

SQL Secure tells you who has access to what on your SQL Server databases. Learn more > >
