

# Action items

This section includes the following topics:

- [About managing action items](#)
- [List action items](#)
- [Perform action items](#)

## About managing action items

The CLI utilities provides the ability to manage action items. This includes fetching action items, executing them, and marking them as done.

## List action items

To list all action items per instance, run the following command from the main Precise FocalPoint root:

```
Windows  infra\bin\psin_cli.bat
        -i3-user <user_name>
        {-i3-encrypted-password <encrypted_password> | -i3-clear-password <clear_password>}
        -action action-item-list
        [-server <server_name>]
        [-proxy-alias <node_alias>]
        [-instance-name <instance_name>]
        [-technology <technology_code>]
        [-id <sequence_id>]
        [-resource-id <resource_id>]
        [-status <status>]
UNIX    ./infra/bin/psin_cli.sh
        -i3-user <user_name>
        {-i3-encrypted-password <encrypted_password> | -i3-clear-password <clear_password>}
        -action action-item-list
        [-server <server_name>]
        [-proxy-alias <node_alias>]
        [-instance-name <instance_name>]
        [-technology <technology_code>]
        [-id <sequence_id>]
        [-resource-id <resource_id>]
        [-status <status>]
```

The instance details can be dropped to show action items which are not per instance. This creates an XML file containing all relevant action items and their details.

**Table 1** Elements of the List action items

Element	Description
i3-user	See Authenticate to CLI Utility on page 8.
i3-encrypted-password	See Authenticate to CLI Utility on page 8.
action	<b>Values:</b> action-item-list <b>Mandatory:</b> Yes
server	Filter action items by server. <b>Values:</b> string <b>Mandatory:</b> No
proxy-alias	The proxy alias. <b>Values:</b> alias of the related node <b>Mandatory:</b> Only for a federated installation
instance	Filter action items per instance name <b>Values:</b> string <b>Mandatory:</b> No

technology	Filter action items by technology code. For more information, see Technology Codes on page 174.  <b>Values:</b> string  <b>Mandatory:</b> No
id sequence	Filter action items to a specific action item  <b>Values:</b> number  <b>Mandatory:</b> No
resource-id	Filter action items to a specific type of action item.  <b>Values:</b> number  <b>Mandatory:</b> No
status	Filter action items by status.  <b>Values:</b> WAIT, DONE, ERROR

## Perform action items

To perform action item(s), run the following command from main Precise FocalPoint root:

```
Windows  infra\bin\psin_cli.bat
-i3-user <user_name>
{-i3-encrypted-password <encrypted_password> | -i3-clear-password <clear_password>}
-action action-item-handle -type <type> [-server <server_name>]
[-proxy-alias <node_alias>]
[-instance-name <instance_name>] [-technology <technology_code>]
[-id <id_sequence>]
[-resource-id <resource_id>]
[-parameter user=<admin3> -parameter password=<@HH>]
./infra/bin/psin_cli.sh
-i3-user <user_name>
{-i3-encrypted-password <encrypted_password> | -i3-clear-password <clear_password>}
-action action-item-handle -type <type> [-server <server_name>]
[-proxy-alias <node_alias>]
[-instance-name <instance_name>] [-technology <technology_code>]
[-id <id_sequence>]
[-resource-id <resource_id>]
[-parameter user=<admin3> -parameter password=<@HH>]
```

**Table 2** Elements of the Perform action items

Element	Description
i3-user	See Authenticate to CLI Utility on page 8.
i3-encrypted-password	See Authenticate to CLI Utility on page 8.
action	<b>Values:</b> action-item-list  <b>Mandatory:</b> Yes
server	Filter action items by server  <b>Values:</b> string  <b>Mandatory:</b> No
proxy-alias	The proxy alias.  <b>Values:</b> alias of the related node  <b>Mandatory:</b> Only for a federated installation
instance	Filter action items per instance name  <b>Values:</b> string  <b>Mandatory:</b> No

technology	<p>Filter action items by technology code. For more information, see Technology Codes on page 174.</p> <p><b>Values:</b> string</p> <p><b>Mandatory:</b> No</p>
id sequence	<p>Filter action items to a specific action item</p> <p><b>Values:</b> number</p> <p><b>Mandatory:</b> No</p>
resource-id	<p>Filter action items to a specific type of action item</p> <p><b>Values:</b> number</p> <p><b>Mandatory:</b> No</p>
type	<p><b>Values:</b> run or performed</p> <p>You can specify "run" only for action items which allows automatic execution. This instructs Precise to automatically perform the related action item.</p> <p>Specify "performed" for action item you've already performed (similar to GUI's "Mark as done").</p>
status	<p>Filter action items by status</p> <p><b>Values:</b> WAIT, DONE, ERROR</p> <p><b>Mandatory:</b> No</p> <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <span style="color: #0070C0; font-size: 1.5em; border-radius: 50%; width: 1em; height: 1em; display: inline-block; vertical-align: middle;"></span> Not specifying the status will return all action items.         </div>
