

Deploy SQLDM Mobile or IDERA Newsfeed

SQLDM Mobile is a Web-based application that includes the IDERA Newsfeed technology and several dashboard views that define your server health and expose critical alerts. You can access the SQLdm Mobile Web site from most smart phones and mobile devices. The IDERA Newsfeed is available quickly as a tab on the [SQLDM Today page](#).

Use the following links to prepare for your SQLDM Mobile or IDERA Newsfeed deployment:

- Check the [supported installation scenarios](#)
- Learn about the [components and architecture](#)
- Review [system requirements](#)
- View the [installation instructions](#)
