

## Get an overview of your services performance

The Services Summary tab includes the status of your Services. You can start and stop your Distributed Transaction Coordinator (DTC), or Full-Text Search by selecting the appropriate button.

SQL Server 2008 and above no longer have a separate full-text search service. If the monitored instance is SQL Server 2008 or above, the full text search does not show on the grid or graph.

The [Service Availability chart](#) displays the DTC, Full-Text Search, SQL Server, SQL Server Browser, and SQL Server Agent status.

An Unavailable status in the chart is caused by a pending status change such as starting, stopping, pausing, and continuing.

## Access the Services Summary view

To open the Summary view of the SQL Diagnostic Manager Services tab, select the appropriate SQL Server instance, click **Services**, and select **Summary**.
