Managing alert rules

SQL Enterprise Job Manager displays alerts that warn you about the status of your instances and jobs. These alerts depend on alert rules that you can configure and customize according to your requirements. Use the option **Manage Alert Rules** under the Alert Rules section to access the tab where you can manage all these settings. For more information on what is available on the **Alert Rules** tab, go to Managing Alerts.

SQL Enterprise Job Manager monitors and manages your SQL Server agent jobs. Learn more > >
