

Choose to take snapshot now

The **Take Snapshot** section gives you the option to collect audit data at the end of the registration process. Choose this option when you want to immediately perform a security assessment on the newly registered instance. Note that you can also manually take a snapshot later by selecting **Take Snapshot** on the **Explore Permissions** view (Click [here](#) for more information about Snapshots). IDERA SQL Secure must collect data from the Registered Server to assess and audit security risks and access rights.

Register a SQL Server

Take Snapshot
Specify whether you want to collect audit data after registering this SQL Server.

Do you want to collect audit data (take a snapshot) after registering this SQL Server?

SQL Secure must collect data from the Registered Server to assess and audit security risks and access rights. This data collection can be scheduled or run manually.

☒ Yes, collect data upon completion of the registration process.

< Back Next > Cancel Help

SQL Server Agent

Before you begin collecting data make sure that the **SQL Server Agent** is running, otherwise the data collection will fail.

If you want to take a snapshot as soon as finish registering your SQL Server instance, make sure to check the option **Yes, collect data upon completion of the registration process**.

Click **Next** to go [Registration Summary](#) section.
