

Database level view

The **Database Level** view groups information in three tabs **Users**, **Roles**, and **Schemas**.

Logins

The **Logins** tab shows all the roles for the database with the following columns:

Name: Shows the name of a user.

User Type: Shows the user type. Possible values are SQL User with Login, SQL User without Login, User mapped to a certificate, User mapped to an asymmetric key, and Windows User.

Login Name: Shows the login name associated with a user. (null values display as blank).

Has Access: Indicates the access status of a user.

The image's data is missing.

Roles

The **Roles** tab shows all the roles for a database with the following columns:

Name: The name assigned to the selected role.

Object Type: Database Role or Application Role.

The image's data is missing.

Schemas

The **Schemas** tab shows all roles for the server with the following columns:

Name: Shows the name of the schema.

Owner: Shows the owner of the schema.

 The Schemas tab isn't available for SQL2000 servers.

The image's data is missing.
