## **Specify File Encoding preferences**

The Workspace panel provides options for Unicode support in SQL files.

Select Preferences > General, expand General and then click Workspace in the tree.

?	OK Cancel

The default encoding for text files on Windows platforms is Cp1252. You can change Unicode support in from file to file using the Text File Encoding options available on the Workspace panel.

~

To change text file encoding in the development environment:

- 1. Select Preferences > General > Workspace and click the Other option under Text File Encoding.
- 2. Use the drop down menu and select an encoding mode from the list provided.
- 3. Click **Apply** to save your changes.

To change text file encoding on a specific, folder, or project:

- 1. Right-click on the file, folder or project that you want to modify and choose Properties.
- 2. Modify the **Text file encoding** selection on the **Resource** properties page that appears.
