

Configure an SQL session

The SQL Session Options dialog provides configuration parameters that indicate to DB Optimizer how to execute code in the development environment.

To modify SQL session options

1. Click the SQL Session Options icon in the Toolbar. The **SQL Session Options** dialog appears.
2. Click on individual parameters in the Value column to change the configuration of each property, as specified.
3. Click **Finish**. The session options will be changed and DB Optimizer will execute the code as specified when you execute it.

Session options only apply to the corresponding editor and are not retained when executing multiple SQL files.
