## **Configure Web Console refresh rate**

Users who want control of the Web Console refresh rate can manage the configuration using the Web Console Refresh Rate page. By default, the console refreshes every 30 seconds. The available range is between 30 and 3600 seconds.

To change the refresh rate, go to the **Administration** tab, and in the **Configuration** section, click **Web Console Refresh Rate**. Make the necessary change, and then click **Save**.
