

Restore Header Only CLI Commands

SQL Safe provides you with CLI commands to help you manually list backup sets in an archive.

To perform RestoreHeaderOnly operations use the following commands:

- SQLsafeCmd RestoreHeaderOnly <backup_archive> [options]
- SQLsafeCmd RestoreHeaderOnly TSM [options]

Where:

Action	Description
<backup_archive>	Path to the backup archive.
Tsm	Use Tivoli Storage Manager (see below for special options).

Security Options

Secure your RestoreHeaderOnly operations with the following options:

Options	Description
-WindowsUsername <domain\user>	<domain\user> - the Windows user that will be used to read/write the backup archive.
-WindowsPassword <pwd>	<pwd> - the password for the Windows user.
- EncryptedWindowsPassword sword <pwd>	<pwd> - the encrypted password for the Windows user generated by EncryptWindowsPassword action.

Advanced Options

The following advanced options help you perform RestoreHeaderOnly operations:

Options	Description
-ArgsFile <filename>	The path to a file containing command-line arguments. <filename> - specifies the file that contains the command line arguments.

Tivoli Storage Manager Options

There are TSM options for your RestoreHeaderOnly operations:

Options	Description
-TsmClientOwnerName <name>	<name> - the client owner name.
-TsmClientOwnerPassword <pwd>	<pwd> - the client owner password.
-EncryptedTsmClientOwnerPassword <pwd>	<pwd> - the encrypted TSM client owner password.
-TsmConfigFile <filename>	<filename> - the configuration file location.
-TsmHighLevel <name>	<name> - the high level file specification (path).
-TsmLowLevel <name>	<name> - the low level file specification (file name).
-TsmTcpServerAddress <address>	<address> - the TCP/IP address for the TSM server.
-TsmTcpPort <port>	<port> - the TCP/IP port address for the TSM server.

For detailed descriptions and available options, see the CLI Help (`SQLsafeCmd help RestoreHeaderOnly`).
