# Server Logins and User Mappings

The **Server Logins and User Mappings** report shows all Server Logins and associated Database User Mappings for each SQL Server, Azure SQL Database, and Amazon RDS for SQL Server instance being audited.

## Recommendation

Review this report to ensure each Login has only the mappings to the databases it should access.

## Getting Started

Follow these steps to create a report:

1. Select the Date, Policy, and Baseline options from the Report Settings box.
2. Select a target instance.
3. Select a Database you would like to analyze.
4. Choose the type of Login.
5. Type or browse for the User name.

6. Click the **View Report** button to generate your report.
