

Use views to get an overview of your environment

In the Home tab, you can check your monitored SQL Server instances status and drill down for details. Each view is expandable and information is grouped by [server status](#) or [tags](#).

The screenshot shows the IDERA SQL Diagnostic Manager interface. The top navigation bar includes 'Home' and 'Alerts' tabs. A sidebar on the left contains a '4 Servers' button, a status summary with 2 Critical, 0 Warning, 2 OK, and 0 Maintenance items, and a 'Tags OFF' toggle. The main content area features a 'Search Servers' bar and a table of four monitored SQL Server instances.

sqldevrds.czvftek9yrdx.us-east-1.r...	karltestdb.database.windows.net	qe-server.database.windows.net	WINDEV2302EVAL
No Alerts	No Alerts	Alerts: 28	Alerts: 4
CPU 0% WAIT 00s/s	CPU 0% WAIT 00s/s	CPU 0% WAIT 00s/s	CPU 0% WAIT 04s/s
DISK 0MB/s MEM 0%	DISK 0MB/s MEM 0%	DISK 5MB/s MEM 12%	DISK 10MB/s MEM 23%

Server Status

You can easily identify the status of your monitored SQL Server instances and take action by clicking on one of the following boxes:

4 Servers Servers

2 Critical

2 Successful

0 Warning

0 Maintenance

If you select all instances with an **OK** status in the server view, the panel displays information only about those instances.

This screenshot shows the same interface as the previous one, but with a filter applied to show only instances with an 'OK' status. The sidebar now highlights the 'OK' status with a green border. The main table displays only two instances, both with 'No Alerts' and 0% resource usage.

sqldevrds.czvftek9yrdx.us-east-...	karltestdb.database.windows.net
No Alerts	No Alerts
CPU 0% WAIT 00s/s	CPU 0% WAIT 00s/s
DISK 0MB/s MEM 0%	DISK 0MB/s MEM 0%

The number of instances shown on the boxes depends on the number of current servers.

Tags

SQLDM Web Console allows you to use tags to view the status filtered by tags or groups of instances and drill down to details.
