

Select secondary databases

Use the Secondary(s) tab of the Log Shipping Policy wizard to select the SQL Server instances and databases where the log backups will be restored.

From here, you can add, edit, or remove secondary databases. Each database can be restored with different options, schedule, recovery mode, etc. For more information about adding secondary databases, see [Specify secondary database settings for the log shipping policy](#).

SQL **Safe** is a high-performance backup and recovery solution for your SQL Servers. [Learn more](#) > >
