# Install reports

The Reports setup program installs and runs the Reports Installer utility. The Reports Installer utility allows you to specify the proxy user account credentials and select which built-in SQL Safe reports you want to deploy.

> ✅ Users with 64-bit installations must follow different steps to install reports. For more information, see IDERA solution 3891: Where do I find the SQL Safe reports? in our knowledge base wiki.

The following procedure guides you through a local installation of Reports. However, you can also deploy Reports remotely.

**To install reports:**

1. Log on with an administrator account to the Report Server computer.
2. Run `Setup.exe` in the root of the installation kit.
3. Read the Welcome window, and then click **Next**.
4. Review and accept the license agreement by selecting **I accept the terms in the license agreement**, and then click **Next**.
5. Accept the default folder for your Reports installation, or click **Change** to specify a different folder, and then click **Next**.
6. Click **Install**.
7. On the IDERA SQL Safe Reports Installer window, specify the following configuration settings, and then click **Next**.
   - Report Server Web Service URL. SQL Safe will display the default Reporting Services URL.
   - Name of the computer that hosts the Report Server.
   - Name and location of the target SQL Safe Repository.
   - Credentials of the Windows account the Report Server should use to connect to the repository database. The specified account should have read permissions on this database.
8. Select which SQL Safe reports you want to deploy to this Report Server, and then click **Next**.
9. Click **Install**.

> ⓘ To successfully deploy reports using this utility, your logon account must have Content Manager rights on the Report Server. For more information, see the Reporting Services Books Online.
