## **Get started**

Use the following checklist to guide you through the process of getting started with IDERA SQL Secure.

•	Follow these steps					
•	Register the SQL Server instances whose security models you want to assess and audit.					
•	Configure snapshots to collect audit data from the registered instances.					
•	Find security issues using the default All Servers policy.					
•	Create custom policies to assess compliance to specific security regulations.					
•	Save assessments for policies you want to use in your audit process.					
•	Compare assessments to identify changes over time.					
•	Perform forensic analysis of your security model using the Permissions Explorer.					
•	Discover vulnerabilities using the built-in reports.					

SQL Secure tells you who has access to what on your SQL Server databases. Learn more > >
