

# SSAS performance view

The SSAS performance view provides comprehensive information on the SQL Server Analysis Services and instances.

In the SSAS performance view you can:

- Get an overview of your SQL Server Analysis Services status and health .
- Add SSAS instances for monitoring.
- Export the current view to a PDF, XLS, or SML file.
- Perform actions on a single BI instance.
- Perform bulk actions on several BI instances.
- Access information of a specific monitored BI instance.

## Overview of your SQL Server Analysis Services

The SSAS performance view provides an overview of your SQL Server Analysis Services. Information displayed includes:

- All monitored instances
- Status of monitored instances
- SQL Server version and edition

## Add SSAS instances for monitoring

Click the **Add SSAS Instance** option above the list to open the Add Instance Wizard. It automatically defines the service you want to monitor as

## Perform actions on a single BI instance

After you select a SQL Server from the list you can perform the following actions:

- Refresh Data:** Allows you to update the information manually.
- Edit Properties:** Allows you to modify the previously established credentials.
- Export:** Allows you to export the information available on the SSAS performance view to a PDF, XLS, or XML file.
- Remove:** Allows you to remove instances that you no longer want to monitor.

Additionally, by clicking the gear icon you can also **Disable Monitoring** temporarily (during maintenance operations), as well as to **Refresh Data** and **Edit Properties**.

## Perform bulk actions on several BI instances

After you select more than one SQL Server from the list, you can perform the following bulk actions:

- Edit Credentials:** Allows you to modify the previously established credentials.
- Export:** Allows you to export the information available on the SSAS performance view to a PDF, XLS, or XML file.
- Remove:** Allows you to remove instances that you no longer want to monitor.

Additionally, you can click the gear icon to access the option to temporarily **Disable Monitoring** (during maintenance operations), as well as to **Edit Credentials**.

<input checked="" type="checkbox"/>	SQL Server	Status	Version	Edition
<input checked="" type="checkbox"/>	AUT-SQLBI-118	Service Running	SQL Server 2008 R2 RTM (10.50.1600.1)	Standard Edition (64-bit)
<input checked="" type="checkbox"/>	CH-SP2010			N/A
<input checked="" type="checkbox"/>	CH-SP2010-1		SQL Server 2008 R2 SP1 (10.50.2550.0)	Standard Edition (64-bit)

Remove

Add SSAS Instance

Bulk Actions for 3 Instances

Disable Monitoring

Edit Credentials

 If you remove an instance, SQL BI Manager no longer monitors that instance and deletes all associated data from the database.

### Access information of a specific monitored BI instance

You can access detailed information about a specific monitored BI instance by selecting it from the Instance drop-down or by clicking the name of the instance from the list.
