Deploy SQLDM Web Console and SQL Diagnostic Manager

Use the following links to prepare for your SQLDM Web Console and SQL Diagnostic Manager deployment:

- Check the supported installation scenarios
- Learn about the components and architecture
- Review system requirements for the SQLDM Web console and SQL Diagnostic Manager
- View the installation instructions
- Log in to the SQLDM Web Console

ⓘ Idera SQLDM Web Console is now part of the installation of SQL Diagnostic Manager 12.2 and later versions. However, Idera Dashboard still supports SQL Diagnostic Manager 12.2 and prior versions.
