

Configure alert duration

SQL Diagnostic Manager allows you to determine the total time an alert is raised for an event occurring on a specified SQL Server instance. The Alert Duration tab of the Advanced Alert Configuration window provides a page for you to enter the duration of the alert in hours and minutes. For the SQL Server Agent Job Failure metric, you can specify whether you want SQL Diagnostic Manager to trigger the alert each time any job fails or to raise an alert only upon the failure of the most recently executed job.

Advanced Alert Configuration - SQL Server Agent Job Failure

Alert Duration

Job Filters

Customize when an alert should be raised.

When should a job failure alert be raised?

Anytime a job failure occurs

Only if the most recent job execution failed

How long should a job failure alert remain active?

The alert should remain active for 0 (Days) 12:00 (Hours and Minutes).

OK Cancel

The metrics that allow for specifying alert duration include the following:

- SQL Server Agent Job Completion
- SQL Server Agent Job Failure
- SQL Server Agent Long Running Job (Minutes)
- SQL Server Agent Long Running Job (Percent)

To use ad hoc Alert Configuration to enter how long a job alert remains active:

1. In the Navigation page, click **Servers**.
2. Right-click the appropriate SQL server instance, and then select **Configure Alerts**.
3. Select the metric for which you want to configure an alert.
4. Click **Advanced**.
5. Click **Alert Duration**.
6. Type or use the selection window to enter the alert duration in hours and minutes.
7. Click **OK**.
8. To accept these changes, click **OK**.

To use Alert Configuration templates to enter how long a job alert remains active:

1. Click  > **Alert Configuration Templates**.
2. Click **New** or select an existing template, and click **View/Edit**.
3. **If you clicked New**, type a name, and click **Edit Configuration**.
4. **If you clicked View/Edit**, click **Edit Configuration**.
5. Select the metric for which you want to configure an alert.
6. Click **Advanced**.

7. Click **Alert Duration**.
8. **If you selected the SQL Server Agent Job Completion, SQL Server Agent Long Running Job (Minutes), or SQL Server Agent Long Running Job (Percent) metric**, continue with the next step. **If you selected the SQL Server Agent Job Failure metric**, select **Anytime a job failure occurs** to trigger an alert each time a job failure occurs, or select **Only if the most recent job execution failed** if you want to raise an alert only when the most recently executed job fails.
9. Type or use the selection window to enter the alert duration in hours and minutes.
10. Click **OK**.
