

Use the SQL Diagnostic Manager web console

The SQL Diagnostic Manager web console helps users identify and diagnose problems quickly in their SQL Server environment. The SQL Diagnostic Manager web console provides key overview information simply through dashboards and high-level views.

- Access the overall status of your SQL Server environment from any connected browser. **No SQL Diagnostic Manager Desktop Console required.**
- Provide an easy-to-use web console without giving access to the entire management console.
- Quickly view the status of a single instance or instance groups (tags) and drill down for details.
- View all active alerts in your SQL Server environment and access detailed information.
- Select different sub-views to diagnose performance issues faster.
- Monitor overall health of queries and drill down through [advanced query views](#) for details.
- View your top values for selected metrics.
