

View your SQL Server alerts in IDERA Dashboard

The Alerts tab of the single instance dashboard displays a color-coded alerts timeline view and an active alerts panel for the selected instance.

Color-coded alerts timeline view

The color-coded alerts timeline view allows you to easily identify the highest alert for your monitored SQL Server instance and the highest alert for a specific category. Each color in the alert timeline represents a different alert type. See the following table for more details:

Alert type	Color	Meaning
OK	Green	The alert is in an acceptable threshold.
Warning	Yellow	The alert reaches a Warning threshold.
Critical	Red	The alert reaches a Critical threshold.

Filter your alert results in the Alerts tab by specifying a timeframe or by selecting default timeframes of 8 hours, 1 day, 5 days, or 4 weeks. Click image to display it in full-sized view.

You can also filter your alert results by alert category or categories' order. Click **Edit** to order and select the categories you want to display in the Alerts timeline view.

Active alerts panel

The Alerts tab also lists all the active alerts of your monitored SQL Server instance over a period of time. The active alerts panel provides the following information:

Alert type

Shows alert type icon:  for OK alerts,  for Warning alerts, and  for Critical alerts.

Time

Indicates date and time of alert inception.

Summary

Displays alert description.

Instance

Displays the name of the monitored SQL Server instance.

Category

Indicates alert category.

Additional options

In the Active alerts panel of the single instance dashboard, you can select the following additional options:

Show alert details

View [additional information](#) on a specific active alert by clicking **Show Details**.

Export

Export your alerts information in PDF, XLS, and XML.

Show/Hide Alerts

Choose to show or hide active alerts.
