

# Apply baseline to multiple instances

SQL Diagnostic Manager allows you to set a baseline configuration for a monitored SQL Server instance, and then apply that same baseline to other instances. Simply select the appropriate instances from the **Available Servers** list, and then click **Add >** to move them to the **Added Servers** list. Click **OK**, and then SQL Diagnostic Manager applies this configuration to the other instances.

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more > >](#)
