# **Database analysis reports**

Database analysis reports provide information on databases that allows you to analyze the current effectiveness of your SQL Servers. Click the links below for more information.

## **Database Analysis Reports**

#### **Top Databases**

Use the Top Databases report to identify your worst performing databases.

#### **Database Statistics**

Use the Database Statistics report to analyze and compare performance trends across two databases.

#### **Top Database Applications**

Use the Top Database Applications report to find database applications that consume system resources.

#### **Mirroring History**

Use the Mirroring History report to analyze the event history for a mirrored database.

#### **Top Tables by Growth**

Use the Top Tables by Growth report to identify the fastest growing tables.

#### **Top Tables by Fragmentation**

Use the Top Tables by Fragmentation report to identify the most fragmented tables.

#### **Tempdb Statistics**

Use the Tempdb Statistics report to analyze performance statistics for your tempdb database.

#### **Transaction Log Statistics**

Use the Transaction Log Statistics report to analyze the use of your log files.

### **Availability Group Statistics**

Use the Availability Group Statistics report to view the historical health of availability groups, availability replicas, and availability databases.

SQL Diagnostic Manager identifies and resolves SQL Server performance problems before they happen. Learn more >>
