

Specify user

The Specify User window allows you to enter the login name and authentication type. Enter either the Windows account name or the SQL login used to connect to the SQLDM Repository. If the SQL login entered does not exist, one is created on the SQLDM Repository Server.

 If the Windows account entered is not a valid Windows account, an error appears when you exit the Add Permission wizard and the SQLDM login is not created.

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more](#) > >
