

# Manage your SQL Server instances

The Manage Servers window (**File > Manage Servers**) allows you to see all the SQL Server instances monitored by SQL Diagnostic Manager. You can:

- Add new SQL Server instances to SQL Diagnostic Manager
- Edit the SQL Diagnostic Manager configuration for a particular SQL Server instance
- Remove a SQL Server instance from SQL Diagnostic Manager
- Access the [VM Configuration window](#) to associate your monitored virtual SQL Server instances to a host machine
- Apply an existing alert template to a server or group of servers
- Test the connection status of your SQL Server instances

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more](#) > >
