

Availability Group Estimated Data Loss (Seconds) alert

The Availability Group Estimated Data Loss (Seconds) alert tracks the time period in seconds that data is not synchronized to the secondary replica. This value reflects the time difference of the last commit between the primary and secondary replicas. Alert includes affected databases.

For more information on configuring alerts and setting thresholds, see [Configure alerts](#) .

 **Enable baseline thresholds**
To enable alerting when this metric is outside its established baseline, click the **Baseline Thresholds Enabled (as percentage of baseline)** checkbox in the Alert Configuration window.

 **Create an alert response bundle**
Create an alert response bundle with the Availability Group Estimated Data Loss (Seconds) alert and related alerts. For additional information, see [Create alert response bundles](#).
