

Availability Group Synchronization Health alert

The Availability Group Synchronization Health alert provides the database synchronization state in the availability group. Possible values include: not healthy, partially healthy, and healthy.

For more information on configuring alerts and setting thresholds, see [Configure alerts](#).

 Create an alert response bundle with the Availability Group Synchronization Health alert and related alerts. For additional information, see [Create alert response bundles](#).

SQL [Diagnostic Manager](#) identifies and resolves SQL Server performance problems before they happen. [Learn more](#) > >
