

# Invite coworkers

You can send invitations to your coworkers to start using the IDERA Newsfeed. When a coworker accepts your invitation, automatically you follow each other.

The SQLDM Mobile and Newsfeed Service emails each of the coworkers you specify, providing a brief description of this feature and a Sign-Up link. You can add your own personal message to the email.

Before you send out invitations, ensure the IDERA Newsfeed Platform is configured to communicate with your corporate mail server.

Follow these steps to invite coworkers using the SQLDM Console:

1. In the right pane of your Most Recent feed, click **Invite Coworkers**.
2. For each coworker you want to invite specify an email address. Use commas to separate multiple addresses.
3. Choose whether to add your own message to the default email.
4. Click **Send**.

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more](#) > >
