

# SSAS instances roll up view

The SSAS instances roll up view of the dashboard provides you with access to specific Analysis Services information for your day-to-day operations. View the top 10 most active monitored SSAS instances. Click the image to view full size.

The SSAS instances roll up view displays the following information:

- SSAS Instance Name
- Availability
- CPU usage in percentage
- Memory usage in percentage
- I/O Activity in Bytes/sec

✓ In the SSAS instances roll up view you can click any linkable instance and drill down to the SSAS Performance view for additional details.

SQL **Business Intelligence Manager** identifies issues within the SQL BI environment to help optimize SQL BI service performance. [Learn more > >](#)
