

# Review details for manual backup

The Summary tab of the SQLsafe Backup wizard provides the summary of specified values and options you have selected in the Backup Wizard.

**What do you do next?**

After you have reviewed the information on the Summary tab, click **Backup** to submit the backup job immediately, or click **Generate Script** to create a script you can use to run the job at a later time. For more information about generating scripts, see [How script generation works](#).

**How do you verify the status of your backup?**

If you chose to run the backup job immediately, and want to verify a successful run, you can view its status using the Instance View. For more information, see [View backup/restore operation status](#).

**What actions can you perform on the Summary tab?**

Action	Steps
Immediately backup databases	Click <b>Backup</b> , and then highlight the instance or database in the tree pane to see the status of the operation.
Create a CLI backup script	Click <b>Generate Script</b> , and then click <b>Command Line</b> . To <b>Save the script to a file</b> , click the saving icon or the <b>Copy script to clipboard</b> icon respectively. SQLsafe creates a backup script using the settings you specified for the selected databases. You can use this script to perform future backups of any system or user database you selected. Click <b>Close</b> to return to the Backup Wizard.
Create a T-SQL backup script	<div>Click <b>Generate Script</b>, and then click <b>T-SQL</b>. To <b>Save the script to a file</b>, click the saving icon or the <b>Copy script to clipboard</b> icon respectively. SQLsafe creates a backup script using the settings you specified. You can use this script to perform future backups of any system or user database you selected. Click <b>Close</b> to return to the Backup Wizard.</div> <div>This script requires the SQLsafe XSP. For more information on installing the SQLsafe XSP, see <a href="#">Deploy the SQLsafe XSP</a>. For more information about how to use the SQLsafe XSP, see the sample scripts available from the Programs menu.</div>
